<b>REPORT</b>	<p>Dr. Menon start the session by explaining the importance of studying Innovation and entrepreneurship and its benefits students and learners from different social and economic backgrounds because it teaches people to cultivate unique skills and think outside the box. Moreover, it creates opportunity, instils confidence, ensures social justice and stimulates the economy. Entrepreneurship education also provides budding entrepreneurs with the skills and knowledge to come up with business ideas and develop their own ventures. And this includes helping them to learn about core business areas such as finance, sales, marketing, management and accounting, not to mention, broader ranging skills such as adaptability, effective communication, and confidence. Further Dr. Menon explained the advantage of learning creativity entrepreneurial skills over more traditional subjects is that they are not uniquely relevant to a career as an entrepreneur. The skills needed to start your own business are relevant in any field and would also be desirable attributes for being an employee. In fact, having a wide range of business-relevant skills acquired through studying entrepreneurship would make you an ideal candidate in most fields. Therefore, skills taught in entrepreneur courses generally apply to all areas of industry and do not kill creativity or block opportunity to a specific career</p>
<b>OUTCOME OF THE ACTIVITY</b>	Students were given a better understanding about how creativity can really bring a change in one's life and lead to the entrepreneurial mindset development that will enhance the enterprising skillsets.
