ABOUT MIMT

Established in 2002, Mangalmai Institute of Management and Technology, Greater Noida is one of the premier NAAC 'A' Grade accredited Institutions with a prime focus on Innovation, Excellence, and Nurturing global leader for a sustainable future. We incorporate Knowledge, Industry experience, Research, and International exposure in our curriculum, to offer comprehensive educational programs to the students. The postgraduate program offered at Mangalmai is affiliated with AKTU, Lucknow, and approved by the All India Council for Technical Education (AICTE) Ministry of HRD, New Delhi.

ABOUT THE SEMINAR

In the 21st century, India is experiencing a profound transformation driven by technological innovation and disruption, often referred to as the Tech Tsunami. This wave of technological advancement, encompassing artificial intelligence, automation, data analytics, and the internet, has revolutionized various sectors, altering how we live and work. While this digital revolution offers numerous opportunities, it also presents challenges, particularly in terms of unemployment and the displacement of traditional jobs. To address these challenges, reskilling and upskilling the workforce are essential, capitalizing on India's young demographic. Government initiatives like Skill India and Make in India aim to equip individuals with the skills needed in the digital age. Fostering a culture of innovation and entrepreneurship is also crucial, as it can create jobs and economic growth. Investing in infrastructure and connectivity, especially in rural areas, is vital to bridge the digital divide. Encouraging industries like renewable energy, healthcare, and information technology services can generate employment. Furthermore, promoting agri-tech and facilitating remote work and freelancing can help harness the opportunities brought by the Tech Tsunami. Predominantly, embracing technology is essential for India's progress, but addressing unemployment challenges requires a proactive approach. Through education, innovation, bridging the digital divide, and supporting adaptable industries, India can lead the way in the digital age and build a stronger, more prosperous nation.

Objectives

1. To enhance the understanding of the emerging discipline of technology and its impact on the lives of the people.
2. To understand the role of Tech Tsunami and sectorial development of the nation.
3. To understand the perspective of different discipline of Tech Tsunami and related challenges.
